

OLD REPUBLIC COMMERCIAL RISK

RadiusR

Your Risk Management Data the Right Way, Right Away

RadiusR is Old Republic Commercial Risk’s intuitive Risk Management Information System (RMIS) built to make analyzing your claims and risk data easier than ever. OR Commercial Risk is passionate about helping our clients succeed, and we built RadiusR to expand your “radius” of risk management.

It puts timely, comprehensive, and meaningful loss information at your fingertips, so together we can understand—and mitigate—your organization’s exposures. It’s part of how we excel in the moments that matter, helping you leverage data-rich analysis for quicker, smarter, and more impactful bottom-line decisions.

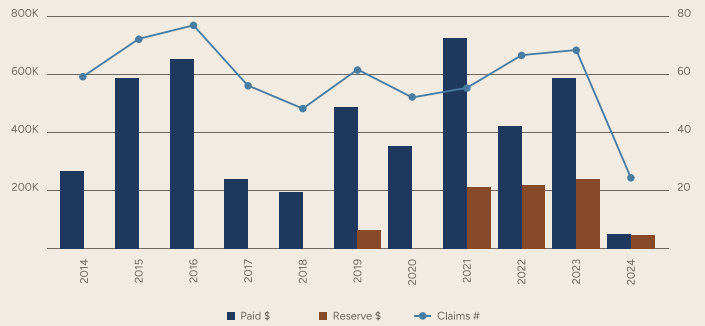

A RMIS Designed for You

RadiusR is a secure, cloud-based RMIS designed to deliver fast access to claims details and data-driven insights in an easy-to-use application. It presents you with a consolidated and organized view of your claims data, providing a single source of truth for all stakeholders.

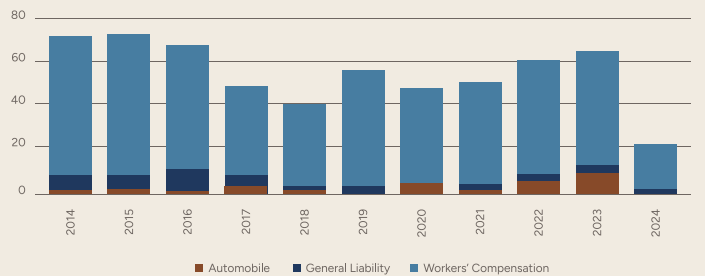

RadiusR helps to transform the way you manage and respond to risk by:

- Providing streamlined access to claims data, enabling faster and more informed decision making
- Enabling full-featured, customizable dashboards
- Automating workflows, reducing manual tasks, and increasing efficiency
- Supporting data accuracy and helping to reduce errors
- Facilitating seamless communication and collaboration across the organization
- Providing access to a vast reporting library to support your data needs
